

**CAGIS: Archaeological Consulting Services** provides full-service contract archaeological, geophysical and remote sensing, and GIS consulting to private individuals, business organizations, and government agencies. Fully licensed and insured, CAGIS offers comprehensive and cost-effective cultural resource management services. CAGIS uses state-of-the-art technology to address project-specific issues and our large pool of experienced university personnel allows us to respond in a timely, flexible, and cost-effective manner, avoiding project delays and minimizing costs. CAGIS specializes in the conduct of Phase I-III archaeological investigations including cell tower and antenna collocations, reviews, visual impact surveys, and wind farm developments. Historic cemetery management services are another of our specialties and include the detection of unmarked burials using ground-penetrating radar and magnetometer surveys.
